Stable Furniture: Oak and Steel Items Care Instructions

Manufacturing Information:

Made from solid oak with wedged legs for a light, strong construction, including a hand-forged iron ring produced by blacksmith Martyn Dean of Jacks Bush. Finished with Osmo hardwax oil and buffed with paste beeswax wax.

Aftercare:

Clean with a soft, lint-free cloth and apply a good-quality paste beeswax every few months.

Hardwax oil is a resilient finish against water, alcohol and heat. It is also very easy to repair if an area becomes damaged.

The damaged area of finish can simply be sanded back and then two coats of hardwax oil applied for an invisible finish.

Please be aware that each piece is handcrafted and inconsistencies will occur between items.

Stable Furniture Simple, accessible, everyday furniture

Product information:

Each piece of furniture in the Stable range has been designed to be a low-cost yet stylish way to access hand-crafted furniture.

The range has been designed to encourage people of all budgets to buy hand-crafted furniture; furniture to be used every day in a multitude of ways, to be good value for money, and which moves away from today's throwaway culture of factory-made, mass-produced pieces.

The designs have been optimised to be as simple, efficient and economical to make as possible, therefore reducing manufacturing costs and the consumer price point.

The Stable range is constructed entirely from FSC approved timber, meaning it has been sourced from responsibly managed forests.

Thank you for supporting an independent craftsman.
